Summary

Full Stack Developer specializing in scalable distributed systems using Spring Boot and modern frontend technologies. Experienced in building end-to-end applications with REST APIs, WebSocket-based real-time communication, responsive UI development, JWT security, and database optimization. Strong focus on performance, usability, and system design. Adept at engineering secure, multi-tenant role-based access architectures and managing full-cycle product development from database tuning to Docker containerization. Proven ability to design rich, high-engagement user interfaces with fluid animations while maintaining solid, highly optimized backend services.

Education

Guru Gobind Singh Indraprastha University (GGSIPU)

New Delhi, India

B.Tech in Computer Science – Internet of Things (IoT)

Sep 2023 – Sep 2027 (Expected)

- Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Architecture, Embedded Systems

Technical Skills

Languages: Java, SQL, JavaScript, HTML, CSS

Frontend: React.js, Responsive Design, Tailwind CSS, UI/UX Principles

Backend & Security: Spring Boot, Spring MVC, REST API Design, Microservices, WebSocket, Redis, Kafka, Kubernetes, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC)

Databases & DevOps: MySQL, Query Optimization, Indexing, GitHub Actions, CI/CD Pipelines, Docker, Railway Cloud, Postman, Git, GitHub

Core Concepts: System Design, Distributed Systems, Scalability, API Gateway, Rate Limiting

Projects

NexCore ERP | *Spring Boot, React, TypeScript, Tailwind CSS, Docker* | 📄 [GitHub](#) | [Live Demo](#) **2025 – 2026**

- Developed a cloud-native monorepo ERP system implementing multi-role access control (RBAC) and real-time financial auditing.
- Built responsive, interactive payroll and HR dashboards with Zod schema validation and Zustand state management.
- Engineered automated inventory tracking systems and multi-channel notification services for instant stock alerts.
- Containerized the full-stack architecture with Docker to streamline local environment setup and remote deployments.

Grassroots Radar | *React.js, Spring Boot, PostgreSQL, Redis, WebSocket* | 📄 [GitHub](#) | [Live Demo](#) **2025**

- Developed a full-stack sports recruitment platform connecting athletes and scouts using React and Spring Boot.
- Built a high-engagement frontend with Framer Motion animations and ApexCharts analytics dashboards.
- Optimized athlete profile search performance using Redis caching with a PostgreSQL-backed architecture.
- Enabled real-time messaging between scouts and athletes using WebSockets.
- Implemented JWT security and integrated Google OAuth for secure onboarding and authentication.

Experience

Self-Driven Project Engineer

Hisar, India

Full-Cycle Software Developer (Independent)

2023 – Present

- Designed and developed full stack applications using Spring Boot and React.
- Built scalable REST APIs and interactive frontend interfaces.
- Implemented secure authentication using JWT and RBAC.
- Automated deployments via CI/CD pipelines using GitHub Actions.

Additional Information

Languages: English (Fluent), Hindi (Fluent)

Interests: Frontend Development, Distributed Systems, Cloud-Native Architecture, Cybersecurity
