

KESHAV GARG

FULL STACK DEVELOPER

+91-9518062276 | keshavgarg070306@gmail.com | linkedin.com/in/keshavgarg736/ | Hisar, Haryana, India

Summary

Full Stack Developer specializing in scalable distributed systems using Spring Boot and modern frontend technologies. Experienced in building end-to-end applications with REST APIs, WebSocket-based real-time communication, responsive UI development, JWT security, and database optimization. Strong focus on performance, usability, and system design.

Education

Guru Gobind Singh Indraprastha University (GGSIPU)

New Delhi, India

B.Tech in Computer Science – Internet of Things (IoT)

Sep 2023 – Sep 2027 (Expected)

– **Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Architecture, Embedded Systems

Technical Skills

Languages: Java, SQL, JavaScript, HTML, CSS

Frontend: React.js, Responsive Design, Tailwind CSS, UI/UX Principles

Backend: Spring Boot, Spring MVC, REST API Design, Microservices, WebSocket, Redis, Kafka, Kubernetes

Databases: MySQL, Query Optimization, Indexing

Security: JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC)

DevOps & Cloud: GitHub Actions, CI/CD Pipelines, Docker, Railway Cloud

Tools: Postman, Git, GitHub

Core Concepts: System Design, Distributed Systems, Scalability, API Gateway, Rate Limiting

Projects

AthleteCoach AI

2025 – Present

– *Spring Boot, Microservices, MySQL, React.js, JWT*

– Engineered a **full stack cloud-native platform** supporting concurrent users using microservices architecture.

– Built responsive frontend using **React.js** for seamless user experience.

– Designed **REST APIs** and integrated **WebSocket-based real-time updates**.

– Optimized **MySQL queries** with indexing strategies for performance.

– Implemented **JWT + RBAC security** for multi-tenant access control.

– Deployed system using **CI/CD pipelines** for zero-downtime releases.

Grassroots Radar

2025 – Present

– *React.js, Spring Boot, PostgreSQL, Redis, WebSocket*

– Developed a **full-stack sports recruitment platform** connecting athletes and scouts using React and Spring Boot.

– Built a high-engagement frontend with **Framer Motion** animations and **ApexCharts** analytics dashboards.

– Optimized athlete profile search performance using **Redis caching** with PostgreSQL-backed architecture.

– Enabled **real-time messaging** between scouts and athletes using WebSockets.

– Implemented **JWT security** and integrated Google OAuth for secure onboarding and authentication.

Experience

Self-Driven Project Engineer

Hisar, India

Full-Cycle Software Developer (Independent)

2023 – Present

– Designed and developed full stack applications using Spring Boot and React.

– Built scalable REST APIs and interactive frontend interfaces.

– Implemented secure authentication using JWT and RBAC.

– Automated deployments via CI/CD pipelines using GitHub Actions.

Additional Information

Languages: English (Fluent), Hindi (Fluent)

Interests: Frontend Development, Distributed Systems, Cloud-Native Architecture, Cybersecurity
